

MasterCard Fleet Card Program

Your fleet travels every road in the country and expenses can be off the map.

Get greater control and flexibility with fleet expenses

Whether you're managing a fleet of trucks or cars, you'll be able to manage costs more efficiently with a MasterCard Fleet Card Program. Accepted at 500,000 fleet-related merchants in the United States, including over 167,000 fuel merchant locations, it gives you more power and greater control of your fleet expenses. A MasterCard Fleet Card program helps you control spending at the individual level by letting you set spending limits and track spending patterns such as grade of fuel, fueling frequency, time of fueling or fuel

location. You'll be able to assign cards to individual drivers or vehicles – choosing from such usage options as fuel only, fuel and maintenance only or another option customized to fit your needs. It improves compliance with company policies by letting you monitor vehicle efficiency, miles per gallon, and scheduled vehicle maintenance such as tire rotation and oil changes.

Track and manage detailed spending data
With a MasterCard Fleet Card Program you can capture and analyze useful data by requiring that vehicle or driver identification numbers be input at the point of sale. With enhanced levels of data about each fleet transaction, including merchant name, city, state, zip code, total purchase amount, and merchant category code, you'll be able to operate your fleet more cost-effectively.

Save time on the road with unsurpassed acceptance

The MasterCard Fleet Card Program helps reduce downtime on the road because drivers won't have to waste time seeking approved vendors. And it helps reduce overall costs per mile and boosts productivity fleet-wide with one-stop shopping for a variety of fleet-related services. Drivers will enjoy the:

- Convenience of having just one card to carry.
- Extensive business and travel benefits, including rich card protection features.

YOU CAN'T BE ON THE ROAD WITH THEM, BUT YOU'LL KNOW WHERE THEY REFUELED.

A variety of tools to keep your fleet running efficiently

MasterCard Smart Data™ OnLine –

A web-based reporting application that helps your company seamlessly organize, consolidate, analyze, and manage financial data from cards, cash transactions, and other MasterCard card programs. Retrieve purchasing information daily, weekly, or monthly. Plus, with Smart Data OnLine, you'll be able to monitor and control fleet expenses, track precisely how funds are spent on fuel and maintenance, set spending limits and track spending patterns, and monitor fuel efficiency and vehicle maintenance.

Aristion® – An innovative, rule-based software program lets you define criteria related to unacceptable card usage. So, when a questionable transaction occurs it is highlighted for further investigations.

Support for your Fleet Card program Implementation Guide

Here you'll find everything you need to get your program off to a great start, including step-by-step instructions for building and rolling out the program. There's even a glossary of important terms, and tools to use for setting up cardholders and enrolling suppliers.

Best Practices – This guide contains tips and advice. This collection of invaluable recommendations comes directly from our own experience on the best ways to optimize your Fleet Card program.

MasterCard Fuel Locator – Use these online tools to find merchants by location, brand, products, and services offered.

Fleet Tax Exemption – Provides a comprehensive reporting of all taxes and lets you recover taxes

three ways. An online fleet merchant directory identifies locations participating in MasterCard's tax exemption program.
