

MasterCard Purchasing Card Program

Everything your company purchases gets carried around on your shoulders.

Uncover the hidden potential in your purchasing program

All those invoices, requisitions and three-way-match steps slowing down purchasing? With the MasterCard Corporate Purchasing Card® you'll get a powerful, all-in-one solution that will help you streamline the entire purchasing process. You'll be able to cut costs, eliminate paperwork, accelerate delivery, and improve cash flow.

All while increasing flexibility and control. Our proprietary analysis tools even allow you to look across your enterprise to spot underutilized opportunities. Purchasing has always been one of the most time-intensive processes in business. Now purchasing can be more efficient with Applied Intelligence™ from MasterCard, which provides superior access to information and better integration into your existing systems.

Save time and money throughout your purchasing process

- Automatically post transaction data to the general ledger.
- Help cut the costs of processing, administration system file maintenance, and operations.
- Negotiate better deals with vendors.

More control where you need it

- Set limits such as dollars per month or per transaction, number of transactions per day or per month or by supplier type.
- Assign cards to individual employees or departments with controls set by you.
- Empower your employees to make purchases when they need to, while you maintain full accountability.

Track every dime with custom reports

- Allocate spending to separate cost centers, project numbers, etc., from one purchasing statement.
- Review reports by detail, frequency, location and management level.
- Make purchasing reconciliation more efficient.

Take advantage of unsurpassed acceptance at millions of locations worldwide

- Benefit from a vast network of suppliers providing enhanced data to meet your needs and improve your existing vendor relationships.

Tools to help you save time and money

No matter how unique your procurement needs are, MasterCard has robust tools to support them. Whether you're a small company dealing with individuals making everyday purchases or managing multiple departments and the corporation's spending, we'll tailor options that can make your card program more cost-effective and cost-efficient.

MasterCard Department Account Program – Enable buying at the department or group level by assigning

an account to an entire group and authorizing certain individuals to make purchases. Essential for your employees who have infrequent purchasing needs.

TURNING THE MOST TIME-INTENSIVE PROCESS IN YOUR COMPANY INTO THE MOST EFFICIENT. DON'T THEY GIVE OUT MEDALS FOR THAT?

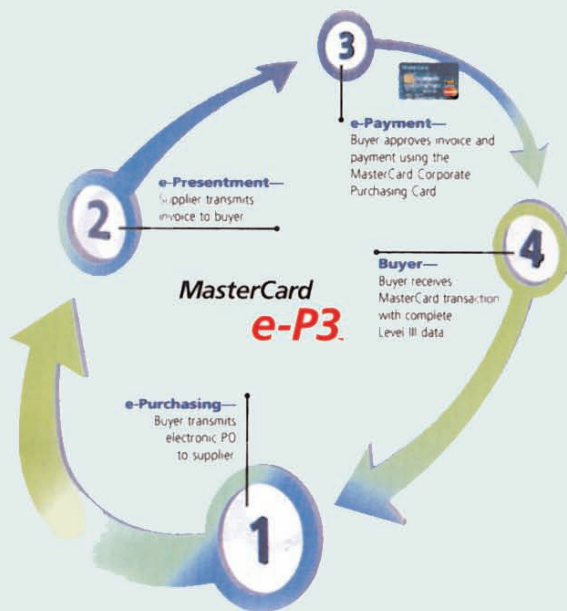

MasterCard Distribution Card – Streamline the accounts receivable process by enabling customers to buy from you with a Purchasing Card program which would then improve your cash management and strengthen your vendor relationships when you do business with key suppliers.

PurchaseLogic™ from MasterCard Advisors – Look at spending across every department to spot problem areas and take advantage of underutilized opportunities. Collect all purchasing data to enable the analysis of payment and procurement methods. See exactly how your company spends money, so you can spend it more wisely.

The MasterCard Purchase Optimizer – This online interactive diagnostic tool will enable you to benchmark your purchasing program against industry standards and your peers in minutes directly from the Web. It will show how you compare to other companies of similar size and attributes across 34 industries with insights you can turn into new business opportunities.

Add new levels of flexibility, control, and integration to your payment system

MasterCard e-P3 – Fully automate the financial and information value chain by integrating MasterCard settlement options into Electronic Invoice Payment and Presentment (EIPP) platforms to provide seamless, end-to-end electronic commerce. Consider higher-ticket transactions and new spend categories like capital goods and advertising. All the while keeping payment timing and amounts right where they belong – under your control.

MasterCard e-P3 collapses the entire “order-to-pay” cycle, enabling your company to transmit purchase orders and receive invoices electronically.

MasterCard Smart Data™ Online – Monitor and control employee spending with this proprietary, web-based reporting application used by over 20,000 companies worldwide. Seamlessly organize, analyze, manage and consolidate financial data from cards, cash transactions, and other MasterCard programs. Retrieve purchase information daily, weekly or monthly. Run reports or create custom files to export for integration with your accounting or ERP systems.

MasterCard® Enhanced Merchant Reporting – Enable your 1099 and Minority and Women Owned Businesses reporting. This online tool delivers program level reporting, which includes spending by total, ticket size, average ticket, industry sector, supplier, and large ticket. Plus, it enables you to track and get credit for supplier spending with specific supplier groups or other program goals.

Automate the oversight of card usage – Aristion®, an innovative, rule-based software program, lets you automate the oversight of card usage company-wide. User friendly and rich with analytical capabilities, it enables you to define criteria related to unacceptable card usage. So when a questionable transaction occurs it is highlighted for further investigation.

VAT Reclaim Service – If you do business globally, this essential service can simplify the entire process of reclaiming a Value Added Tax (VAT) refund.

Unrivaled support for every phase of your program

Implementation Guide – Everything you need to get your program off to a smooth start – including step-by-step instructions for building and rolling out your program, a glossary of important terms, and tools to use for setting up cardholders and enrolling suppliers.

Best Practices – MasterCard has years of experience optimizing Corporate Purchasing Card programs and can provide best practice guidance for implementing and maintaining a quality purchasing card program.

Conversion Tips – Designed to help you make a seamless transition to the MasterCard Corporate Purchasing Card program.

Tutorial – An online training tool – complete with quizzes and interactive spreadsheets – to assist you and your cardholders with program implementation.

Merchant Locator – Use this online tool to identify merchants that support the MasterCard Corporate Card Program with enhanced data capture capability (Level II and III data).

Merchant Acceptance Reporting Service (MARS) – Matches merchant information with transaction data to help you identify which company vendors accept MasterCard, and what level of data they provide.

Put the Applied Intelligence of MasterCard Worldwide to work for your payment program

If you're looking for a new source of profits the MasterCard Corporate Purchasing Card® program can help. Working with your existing financial systems, we'll develop a custom payment solution that will allow you to increase control, cut costs, and tap the hidden potential in your payment program.

MasterCard Worldwide. Helping you find profits in new places.
