

# Finally, A Travel Expense Solution that Does it All...

## *MasterCard and Outtask Team Up to Redefine Efficiency and Bring Critical Cost Savings to the Entire Travel Expense Management Process*

In an age of rapid information exchange, travel and expense management can be a daunting process. To manage efficiently, you need a fast and reliable way to access the lowest fares. You need a convenient and secure way to pay. You need accurate expense reports that are submitted in a timely fashion. You need a way to verify employee compliance with your travel program guidelines. You need business solutions that communicate with each other and that can be easily integrated with your enterprise resource planning (ERP) system.

Now, all this and more is just a phone call away.

Thanks to a new alliance between MasterCard and Outtask, a leading global provider of travel and expense management solutions, you can easily automate all aspects of the travel booking and expense reporting, management, and reimbursement processes. And the comprehensive MasterCard/Outtask solution lets you extend the value of your ERP system and benefit from the unique features of web-based applications.

## **Simplified Expense Reports with the Information You Need for Better Decisions**

With the combined resources of MasterCard and Outtask, expense reporting has never been easier. MasterCard transaction data feeds automatically from the MasterCard Global Data Repository into Vinnet™, Outtask's online expense management solution that completely automates the capture, submission, approval and reimbursement of expenses.

Vinnet automatically populates expense reports with MasterCard detailed transaction data as well as booking information from Cliqbook™, Outtask's web-based travel management solution, dramatically increasing quality of information captured while reducing the time to submit an expense report. With transaction data automatically populated and expense reports electronically submitted, employees are free to deploy more time to productive activities. The data Vinnet captures is pre-integrated into your organization's ERP system, maximizing your existing financial systems investment.

The result? By using this web-based travel and expense management solution, you can expect to see a significant reduction in ticket and processing costs as well as faster access to critical data that will let you negotiate better vendor contracts, ensure compliance and improve the way you manage travel in your organization.

## **The Best Way to Pay™, and Receive Reliable, Accurate, Enhanced Data**

There is no better payment mechanism to complement the convenience of automated expense reporting than MasterCard Corporate Payment Solutions® card programs. By building and maintaining a direct pipeline into Outtask's expense management software, MasterCard gives organizations that use its card programs 24/7 access to detailed transaction data.

Thanks to a new alliance between MasterCard and Outtask, a leading global provider of travel and expense management solutions, you can easily automate all aspects of the travel booking and expense reporting, management, and reimbursement processes. And the comprehensive MasterCard/Outtask solution lets you extend the value of your ERP system and benefit from the unique features of web-based applications.

The benefits of the MasterCard/Outtask alliance are maximized for organizations that use the MasterCard Corporate Multi Card®. The MasterCard Corporate Multi Card lets you combine your purchasing, travel and fleet payment capabilities onto a single card. MasterCard's sophisticated global network and Global Data Repository ensure that the Corporate Multi Card's transaction data is efficiently captured and seamlessly delivered by way of Vinnnet, minimizing data manipulation or error. Your organization will receive a stream of reliable detailed electronic data with which to identify and analyze spending trends, check compliance with company policies, and substantially boost cost savings and efficiency.

### **24/7 Access to the Lowest Fares on the Market**

With the new MasterCard/Outtask solution, your employees will also gain instant access to their flights—including those listed only on the web. Cliqbook simplifies online booking, integrating fares from multiple Global Distribution Systems, consolidator and Internet-only sources into a single booking screen. That means your employees no longer have to spend valuable time surfing the web to locate the lowest fares.

Cliqbook cross references all search results with your company's travel policy, and reports available flights with a "traffic light" color coding to indicate which flights can be booked under corporate travel policy guidelines and which need higher approvals.

The result? Travel managers can rest easy in knowing that flights are being booked efficiently and in strict adherence to travel policy guidelines, regardless of whether they are booked online or through their travel agency.

The combined power of MasterCard Corporate Payment Solutions card programs, Cliqbook and Vinnnet will save your organization time and money, and bring unprecedented convenience to your travel and expense process.

The MasterCard/Outtask alliance reinforces each partner's well known commitment to service and excellence in payment and expense solutions.
