

A total payables solution that connects issuers, buyers and their suppliers? And people think bankers are dull.

The MasterCard Payment Gateway™— the advanced way to pay and increase profits.

MasterCard **Payment** **Gateway**

MasterCard Worldwide has always been at the forefront of straight-through payment processing and now we're taking payments to the next level with the MasterCard Payment Gateway.

This breakthrough evolution in payment systems connects issuers, buyers and their suppliers faster and more efficiently than ever before.

Now you can give your clients an enterprise-wide electronic solution for all their payment needs—including card, electronic funds transfer, and check. Instead of multiple systems and workflows to support each payment type, they'll have one streamlined total payables solution that will help them increase productivity, enhance security, and increase profits.

A better engine for driving bank revenue.

The MasterCard Payment Gateway isn't just good for your clients, it's good for your bottom line. Offering it can help you:

- Increase payment volumes without building additional infrastructure
- Grow profits by generating additional fees
- Deepen relationships with your customers
- Customize and brand your offering to set your bank apart from the competition

What's more, the MasterCard Payment Gateway is modular, so it can be easily tailored to your needs.

The MasterCard Payment Gateway has arrived just in time.

Electronic B-to-B payments are growing at a rapid rate and now your customers can take full advantage:

- Approximately 25 billion corporate electronic payments in 2005
- Volumes are growing at 10.5% worldwide
- Growth rates are expected to exceed 20% in some countries
- Estimated 60 billion check payments, 70% worldwide
- Less than 1% of global business purchases are card based*

ONE ELECTRONIC SOLUTION FOR ALL PAYMENT PROCESSING NEEDS? GLAD WE GOT THAT SETTLED.

Helping turn payments into profits.

The MasterCard Payment Gateway gives your corporate customers a total payables solution that helps them improve productivity and increase profits. Benefits include:

- An enterprise-wide approach that supports both card and non-card payments
- A single payment warehouse for all transactions
- A single bank interface eliminates the cost of maintaining multiple bank interfaces
- Straight-through payment processing to pay for approved invoices to help you optimize working capital
- Fewer operational expenses and errors associated with paper check processing
- The transparency to provide enhanced control and security
- A comprehensive B-to-B Supplier Network with an easy-to-access directory

Let us show you the money.

The MasterCard Payment Gateway can open the way to increased revenue—for you and your customers. It's another example of our commitment to helping banks and their customers find profits in new places.

A total payables solution that connects issuers, buyers and their suppliers faster and more efficiently than ever before.

Easier to sell. Easier to customize.

Everything about the MasterCard Payment Gateway is designed for simplicity. You'll find it's easier to sell and implement because it:

- Leverages your clients' technology investment by integrating easily with their existing payment and ERP systems
- Streamlines administrative processes
- Decreases the number of workflows
- Reduces multiple bank interfaces
- Keeps suppliers at your clients' fingertips with an easy-to-access directory
- Enhances your proprietary solutions; you pick and choose the module(s) to leverage.
