Digital payments are booming.
Fraud tactics are evolving.

\$11.4t

(USD) projected value of
global e-commerce
transactions by 2029¹

\$425b

in card fraud losses
expected globally
2023-2032²

141%

projected growth in
e-commerce fraud losses
between 2024 and 2029³

¹ Juniper, Global e-Commerce Market Poised to Reach \$11.4 Trillion by 2029, Driven by Alternative Payment Methods, August 2024.
² Nilon Report, December 2023.
³ Juniper, e-commerce fraud to exceed \$107 billion in 2029, October 2024.

OPPORTUNITY

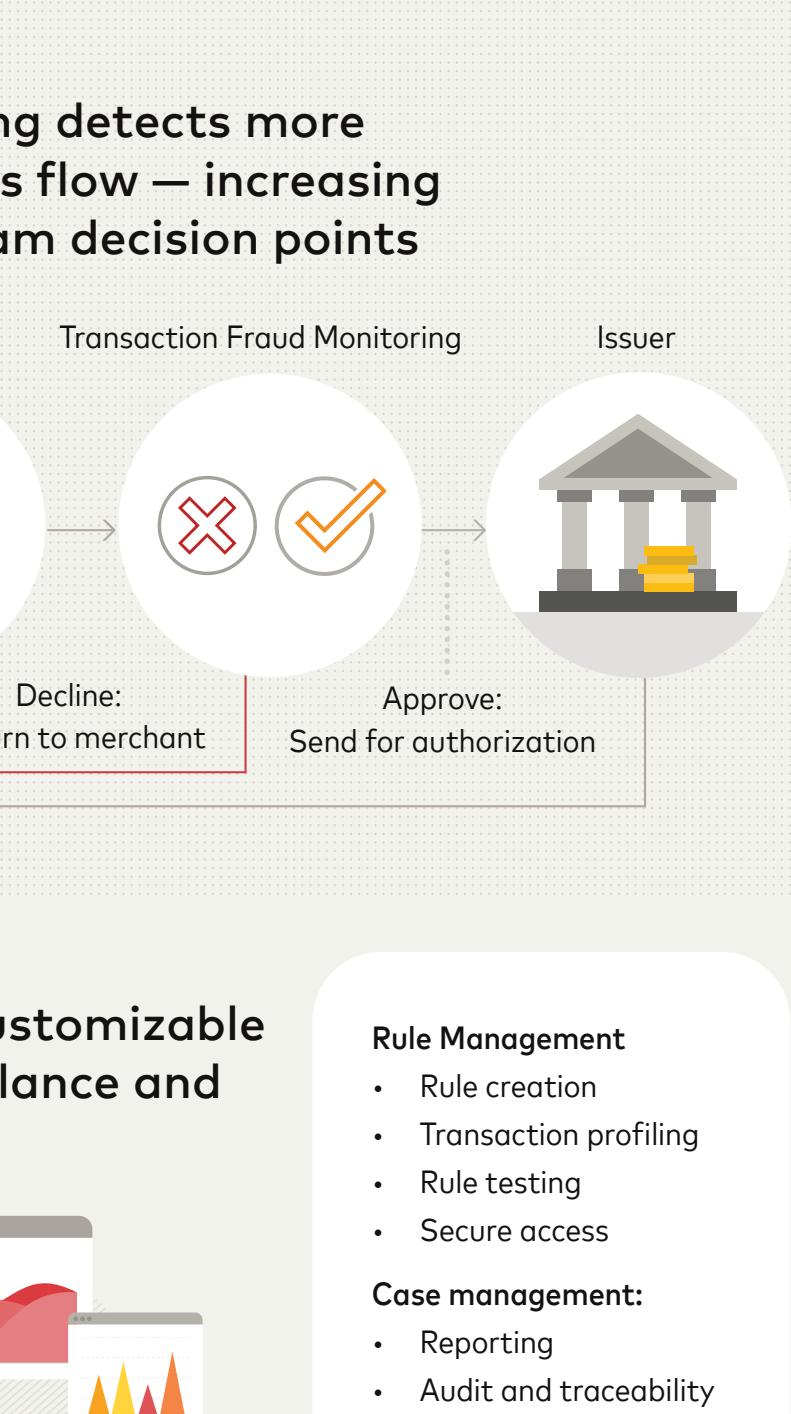

Merchant service providers
need intelligent tools to stay
ahead in today's ever-changing
fraud landscape

Goals

- Detect more fraud pre-authorization
- Approve more genuine transactions
- Reduce false declines
- Improve the customer experience

Strategies for success

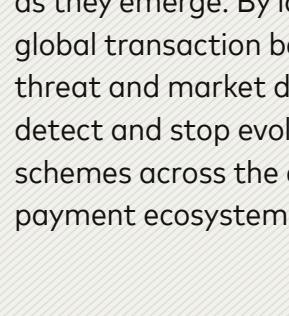

- Score transactions earlier in the payments flow
- Manage risk with robust tools and insights
- Use global fraud and consumer intelligence
- Deploy advanced AI models quickly and effortlessly

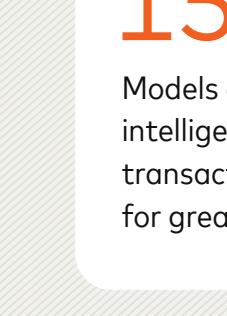

SOLUTION

Transaction Fraud Monitoring detects more
fraud earlier in the payments flow — increasing
approval rates at downstream decision points

Consumer purchase

Decline:
Return to merchant

Approve:
Send for authorization

RESULTS

An intuitive interface with customizable
modules makes it easy to balance and
manage risk

Rule Management

- Rule creation
- Transaction profiling
- Rule testing
- Secure access

Case management:

- Reporting
- Audit and traceability
- User management

Business Insights:

- Self-serve analytics
- Standardized reporting
- Actionable intelligence
- Aggregated metrics

Powered by advanced AI and global
transaction intelligence, scores are highly
accurate and delivered in real-time

Mastercard sees fraud patterns
as they emerge. By layering
global transaction behavior,
threat and market data, we
detect and stop evolving fraud
schemes across the entire
payment ecosystem.

150b+
Models are trained on
intelligence from 150b+
transactions annually
for greater accuracy
